Erratum

Thompson, M., C. Hrabok, D.E. Hay, C. Haegele, and B. Armstrong. 2003. Juvenile herring surveys: methods and data base. Can. Manuscr. Rep. Fish. Aquat. Sci. 2651: 31p.

Page 3: line 3 formula should read:

(Catch weight of species / Mean weight of species) = Catch

and

$\sum$of all species catch weight = Total catch weight

where:

Catch = total number of a specific species caught
Mean weight of species = average weight (g) of specific species caught
Catch weight of species = sum weight (g) of specific species caught
Total catch weight = sum weight (g) of all species caught
